

Aluminium Scaffolding

Service & Maintenance

Ground Support Equipment

Unique access system that offers more safety and comfort!

The CR dormer scaffold offers the opportunity to extend your mobile scaffold towards a dormer with up to 2 platforms.

Whereas our colleagues with their so called extension consoles are often in conflict with the gutters due to the braces underneath floor level, we offer more flexibility.

Other advantage is that immediately a guardrail is in place when mounting the CR dormer frames. These special dormer frames are mounted with swivel couplers to the mobile scaffold and are provided with soft cushioned support rolls.

Specifications

- Safe and quick
- Extendable up to 2 platforms
- Fits all common brands
- Made in The Netherlands
