Zigzag and Parallel Stairway Tower

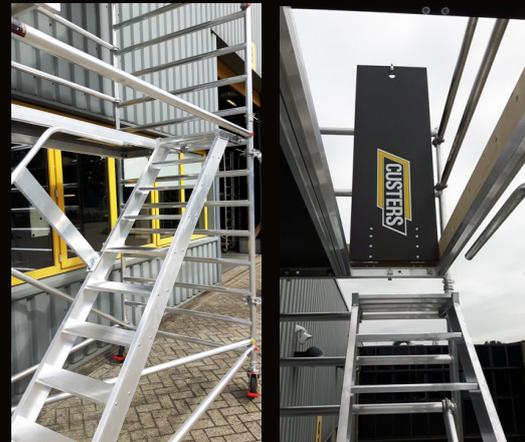

Get up safely with full hands!

Custers Stairway Tower offers easy access to the work platform when materials have to be taken upwards.

The zigzag assembly offers a fast system due to the minimal number of parts.

The parallel assembly offers an every 2 meter resting platform, that can easily be upgraded to a working platform using the optional toeboard sets.

Instead of a fully closed work platform with the special stairway tower platform, a single platform can be used in combination with the optional centre guardrail.

Specifications

- EN 1004 TÜV certified
- Zigzag assembly for quick access or working at only 1 level
- Parallel assembly with resting platforms on facade side
- Available in length: 1.8m and 2.5m
- Up to 14m working height inside
