Lightweight aluminium Façade scaffolding system!

This high quality SP certified aluminium façade scaffolding system offers a safe work spot in a user friendly way.

The lightweight frames combined the 12mm plywood platforms guarantee easy erection of the system. Parts like platforms and horizontal braces are interchangeable with the Custers Mobile tower system.

Access to the platforms is realised using special ladder platforms with hatch or a tower scaffold that is mounted to the façade scaffold. The handy Super 4 system can easily be extended with a variety of accessories like brackets and lattice beams.

Specifications

- Aluminium frames with tube wall thickness of 4mm
- Working height up to 26 meter
- Can endlessly be extended alongside the façade
- Meets EN12810
- Made in the Netherlands
