

Aluminium Scaffolding

Service & Maintenance

Ground Support Equipment

Light weight to the top!

A weight reduction of 25% for a 2.5m platform without concessions!

This platform is TÜV certified in accordance with the Custers scaffolding tower systems. The panel consists of a polypropylene (PP) honeycomb and finished with fibreglass reinforced layers of polyester.

This durable material is UV resistant and is flame resistant according to B2 DIN 4102. Most chemical products do no harass the material and the surface meets floor slip according to DIN 51130 R11.
